

Aqualance Lancing device

- Adjustable Lancing Device
- Five Depth Settings
 - Ergonomic Design

Alternate Site Testing (AST)
 Clear Cap Lancing Device

Phoenix Healthcare Solutions is proud to announce the arrival of its new Aqualance Lancing Device. It was designed with one goal in mind, maximum patient comfort. The new Aqualance Lancing Device achieves virtually pain free sticking by controlling the vibration of the internal mechanism that holds the lancet. The lancing device includes a professionally engineered **Internal Vibration Control System (IVCS)** that dramatically reduces the vibration within the device and controls the movement of the lancet needle tip when fired. By using the IVCS, pain and discomfort is greatly reduced because less movement and vibration simply equals less pain. Treat yourself and your patients to the most advanced lancing device system in the world today!
